About Me

I maintain a delicate balance between process and results-oriented approaches. I'm process-oriented enough to create sustainable products, yet results-driven enough to deliver on time. My passion for modern technologies and eagerness to learn new skills drives my continuous growth in the field. What sets me apart is my problem-solving ability and dedication to tackling challenging tasks. The sacrifices I make to accomplish difficult missions bring me joy, as they contribute to creating meaningful solutions that make a real impact.

Experience

PromptAI - Founder & Full-Stack Developer 10/2023 - Present

PromptAI is a marketplace for AI-powered SaaS. With PromptAI, developers can easily develop (like developing a serverless function) their own SaaS and deploy them to the PromptAI cloud, end-users can use these SaaS in the PromptAI UI. PromptAI manages the entire lifecycle of the SaaS, from development to deployment to billing. In this project, I'm developing the entire backend, including serverless functions infrastructure.

Technologies: [Node.js](#), [Vue.js](#), [Kubernetes](#), [GKE](#), [Docker](#), [MongoDB](#), [Redis](#), [PostgreSQL](#)

Altogic - Flutter Developer Advocate 9/2022 - 10/2023

Altogic is a BaaS (Backend as a Service) platform that offers various solutions, including visual scripting, on the backend side. At Altogic, which is currently inactive, I was responsible for Flutter/Dart API integrations, development of some core features, and leading the Flutter community.

Technologies: [Flutter](#), [Dart](#), [Node.js](#)

Yeni Dijital - Flutter Developer 8/2022 - 4/2023

Yeni Digital develops mobile applications for scientific congresses under "Serenas" brand and various business solutions for other companies. I architected a modular "Mobile application as a package" system with Flutter, enabling rapid deployment of customizable applications. The solution features 6 base designs and flexible customization options, significantly reducing development time. I also led a team for ongoing deployments and customizations.

Freelance - Flutter Developer 1/2018 - 11/2021

Developed mobile applications with [Flutter](#), [MongoDB](#), [Redis](#), [Node.js](#), [Firebase](#) for many projects.

Contributions & Community
